Continue

Robocraft is a fun game, a mixture of action, construction and even tactics. Players can create their own robots using small cubes and other items such as weapons, wings, engines, wheels, tracks, armor and more, all of which have many types. This rich array of building materials, combined with the incredible flexibility of the construction system itself, means that players can let their imagination run wild. The number of different robots that you can build is virtually endless. From old school tanks and airplanes, through hovercraft and spider bots to crazy, futuristic mega-machines. It's all there. The grind can get tiring very quickly though. Unlocking new parts and collecting robes, currency games, takes a long time. Some people can enjoy playing with smaller robots and beginner parts. It can be especially cool with friends, and personally I haven't had that much of a problem with it. But generally speaking, we all want to get to these mega-robots and epic battles with tons of big weapons, shooting left and right. And we want to get there as soon as possible. If you're tired of grinding, there's a working Robocraft Hack with lots of interesting features. If you want to progress faster by generating robes, or just playing with the speed of the hack, it's up to you. I checked this hack myself, one thing I can say for sure is that if you use it just to rob or add premium time to your account you won't get banned. You can also get away with speed or damage hacks if you bump normal values just a little bit, perhaps up to 1.2 (20% more) at most. This Robocraft cheat is undetectable, so until you get informed by other players and checked manually, you're safe. Take a look at it: If you want to download it, click on this link: Use the hack quite simply, just make sure that Robocraft runs in the background and you log in. Then just run the hack and use the features you want. As a small refinement: Unlimited processor makes it so that there are no restrictions on the number of cubes or other items on your robot. Unlimited energy is a kind of self-evident ... No proliferation of weapons means perfect accuracy with all weapons, always. Unplugging disables the recharge (who would have thought) your robot. Recharge is like cooling down in other games, so with this option you can use the ability all the time. The instant reboot is self-evident too. Great for rails. The speed of the hack is limited for a reason, setting it above 10x often crash games, or cause strange glitches. - Welcome to MPGH - MultiPlayer Hacking Games, World Leader in Hacking Games, Games Cheats, Trainers, Combat Hacks - Codes, Cross Hacks and Cheats, WarRock Hacks and Cheats, SoldierFront and Codes, Project Blackout Hacks and Cheats, Operation 7 Hacks and Cheats, Blackshot Hacks and Cheats, A.V.A. Ad blockers - creating paywalls and destroying free content since 2006. July 27, 2014, 12:28 PM #2 n00bie Robocraft railgun hack speed hack can be detected anyway, but here's one of me. Rail gun endless ammo/no reloading There are two ways I've figured out to achieve this. The first requires a memory scan of every match played, the second every time the game restarts and creates a small bug in the garage. The first - requires at least 2 railguns (best 3) the second method - requires at least 2 railguns error with the second method of repairing your robot, it will repair your robot, but it will be seen as irreparable. Solution: Click g, select another robot and go back to the previous one. iTokajo is offline on July 28, 2014, 02:43 PM #3 n00bie No recoil for railgun Railgun no recoil CE auto assembly script code: ENABLE alloc (norecoil_alloc:38) alloc (norecoil_alloc_junk:24) Simbol Register (norecoil_addr) registers norecoil_addr_sec (norecoil_addr_sec) aobscan (norecoil_addr:E8 ?? ?? ?? ?? 83 C4 10 D9 5F 1C E9 ?? ?? ?? ??
